EDITOR'S NOTES

As each of us travel to the flyin, feild each week in anticipation of finding that perfect thermal and the all time record. We may forget some of the basic rules of safety. Please remember there may be new pilots or young people about who do not know the safety of the feild nor the importance of it. Always try to remember to not fly directly over the pit area or to close to another pilot, your frequency may overlap. Please remember to call out if your plane is coming in low over head "HEADS UP" to give the other pilots fare warning. I would hate to think that one of our pilots last thoughts would be of being snuffed out by his best friend's sailplane .

Good pilots are hard to find so with just a few thoughts to safety we all can enjoy the feild and the sport we all love. FLYING!

SAFETY COMES FIRST STYLE SECOND.

BUILDERS

Any one interested in doing occasional building, Radio installations and or monokotoing please contact Pete Richardson, 556-7151.
